PROBLEM

Retail traders have no single trading tool that is convenient, free and secure

Only ~8% of crypto holders trade actively.[1]

Exchange notation from the pre-computer era

The current UX is clumsy to use; professional platforms are overloaded and demand a steep learning curve.

AI tools haven't reached maturity yet

The industry is still working out what AI assistants will be — this niche is open for us.

A double barrier: cost & trust

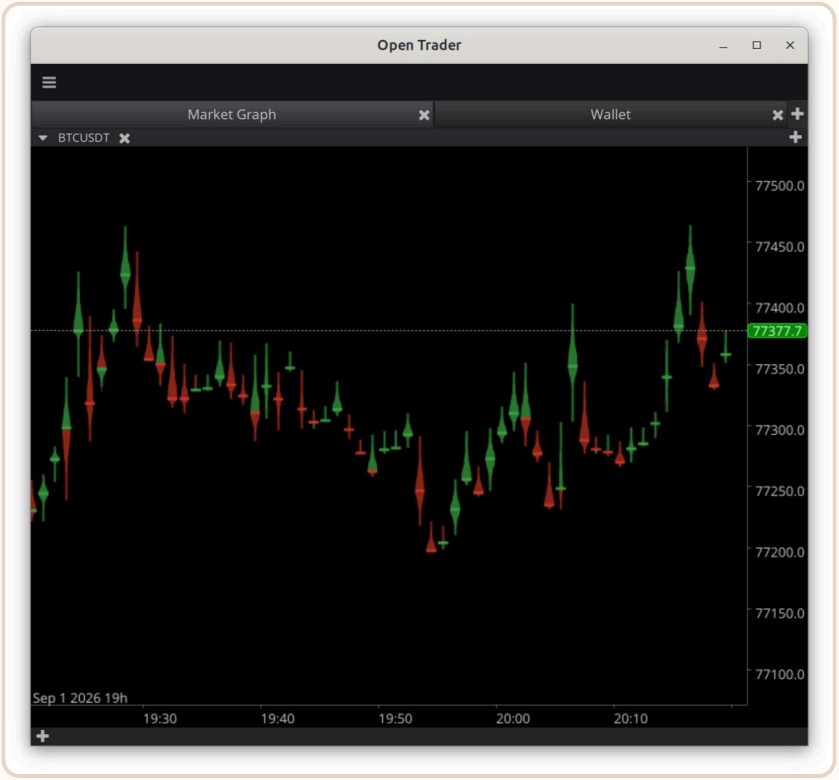

Pay blindly before any result — and hand your API keys to a third-party service.

[1] Coinbase: 115M users, ~9.2M transacting monthly (~8%). Business of Apps

SOLUTION

A free, open-source trading terminal with an AI assistant.

New notation — HLMV (High, Low, Mean, Volume)

Trader HUD

A trading H.U.D. — everything at hand, one click away: chart, positions, orders, history and controls on a single screen.
TA markers computed automatically.

AI-Asassin

Helps you get registered on exchanges.
Builds strategies and supervises their execution.
Orchestrates the work around the trader.

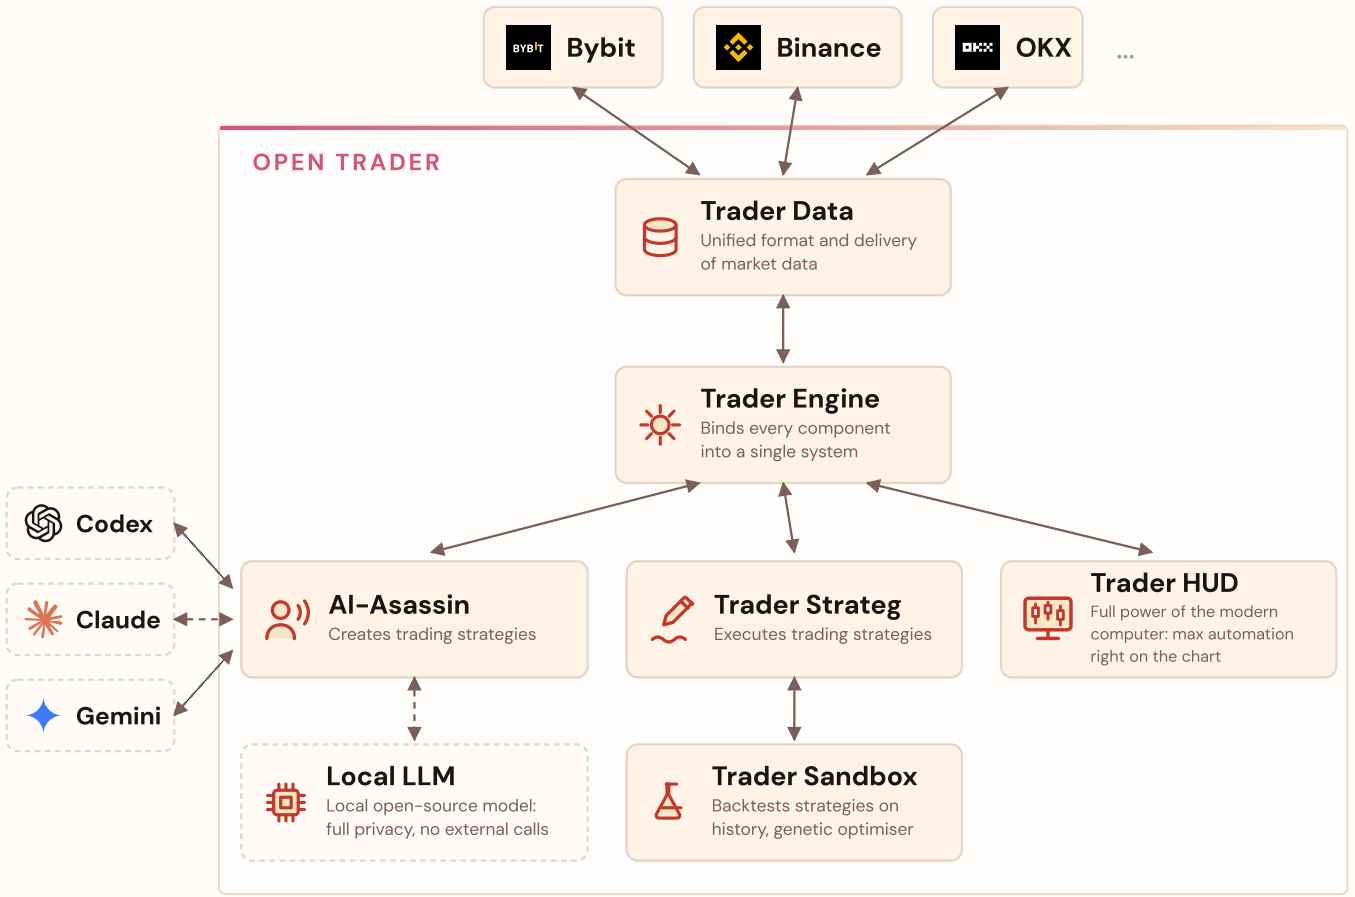

Open Source

API keys are stored locally.
Monetisation through a share of exchange commissions.

PRODUCT

Open Trader solves the trader's full task set

Standalone: API keys are stored locally.

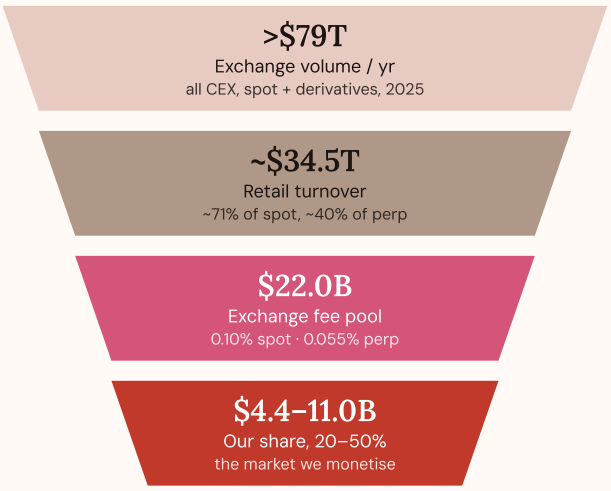

Auto TA markers · Dynamic orders · Catch the Tail · New order types · Order book synced to the chart on the price axis · Backtesting & genetic optimiser

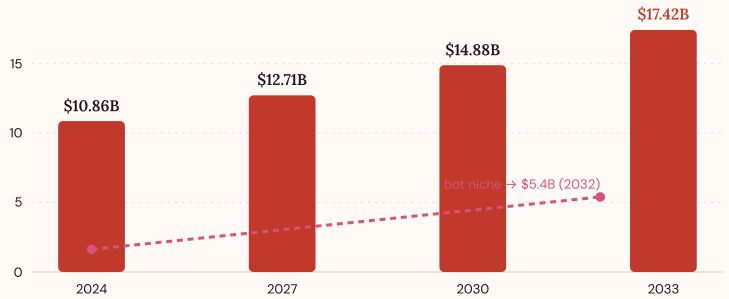

MARKET

A share of the exchange fee pool

FROM EXCHANGE VOLUME TO OUR REVENUE

TRADING-PLATFORM MARKET

- Trading platforms, all asset classes · $10.86B→$17.42B · CAGR 5.4%
- Crypto-bot niche · $1.63B→$5.4B · CAGR 16.2%

Our SAM: **technically-minded users** — both those already trading and looking for a better tool, and those who won't start without a clear, convenient one.

COMPETITION

The only trader UI with an AI assistant, earning primarily from exchange fee share

	OPEN TRADER	HUMMINGBOT	OCTOBOT	CRYPTOHOPPER	TRADINGVIEW	FREQTRADE
Open Source	✓	✓	✓	×	×	✓
Price to user	Free	Free	Free +$10–30	$24–107	$15–60	Free
Fee share revenue	✓	✓	×	✓	✓	×
Legal structure	Company	Non-profit/DAO	SaaS	SaaS	SaaS	No entity
Visual trading UI	✓	×	×	✓	✓	×
AI assistant	✓	×	✓	✓	×	✓
Zero Trust / local keys	✓	✓	✓	×	×	✓
Usable without code	✓	×	✓	✓	✓	×

Our edge is the one combination no rival ships: a **trading terminal for manual & semi-automatic trading** — not a bot-runner panel.

Visual control of the whole situation + automation they decide on — a deliberate choice.

BUSINESS MODEL

Revenue from the trader's first trade

USER = Trader

CLIENT = Exchange

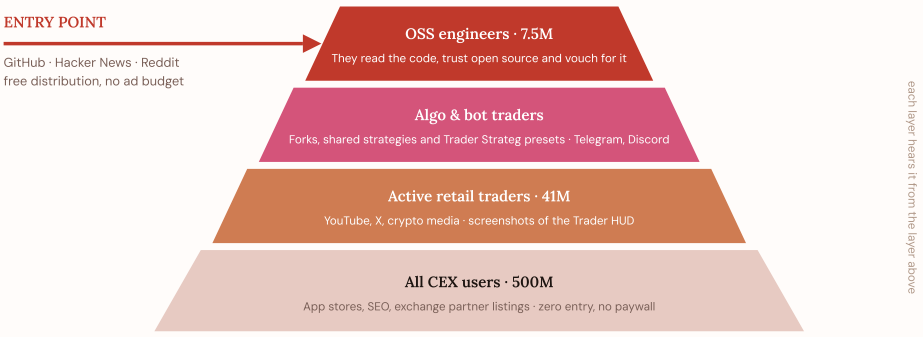

REVENUE = Fee share

DISTRIBUTION = Open Source

Exchange fee share via **Broker ID** · from the first trade, no volume threshold · 20–30% on Broker ID, up to 45–50% once upgraded to Broker Master

Referral stream · users registered through the AI assistant, **30–33%** of the exchange fee from day one, no volume threshold

Open Source *(distribution)* · open, auditable code · **free entry, user trust** · viral funnel

KEY RISKS & MITIGATION

RISK	MITIGATION
Fee-share dependence	3 exchanges in parallel · Fee share
Crypto winter	Fee share follows volatility, not direction; shorts + grid
Regulatory	Non-custodial; KYC on the exchange; AIFC → Cayman/SG

UNIT ECONOMICS

The unit is the trade: $0.41 revenue at 100% margin

$0.41
REVENUE PER TRADE
spot $0.64 · perp $0.35 · 19% / 81% of trades

100%
MARGIN PER TRADE
non-custodial · no server costs

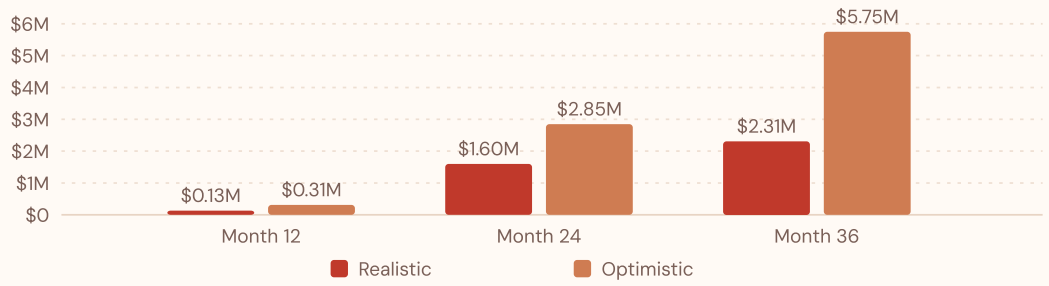

470K
TRADES PER MONTH AT MONTH 36
realistic: 13,443 traders × 35 · ARR = trades × $0.41 × 12

$230
LTV
35 trades × $0.41 × 16 mo

16 mo
TRADER LIFETIME
1 / 6.25% monthly churn

$86
CAC
ads $150 / community $60 · LTV / CAC 2.7 · payback 6 mo

ARR RUN-RATE, $M — ORGANIC + SEED MARKETING

The tool's lift in trades per trader is not in the base: the pilot measures it from each trader's exchange history before and after connecting. At ~30% more trades LTV / CAC is 3.5.

Cohort calculation, spot and perp separately, with sources — the "Revenue per Trade: Evidence" document is available on request.

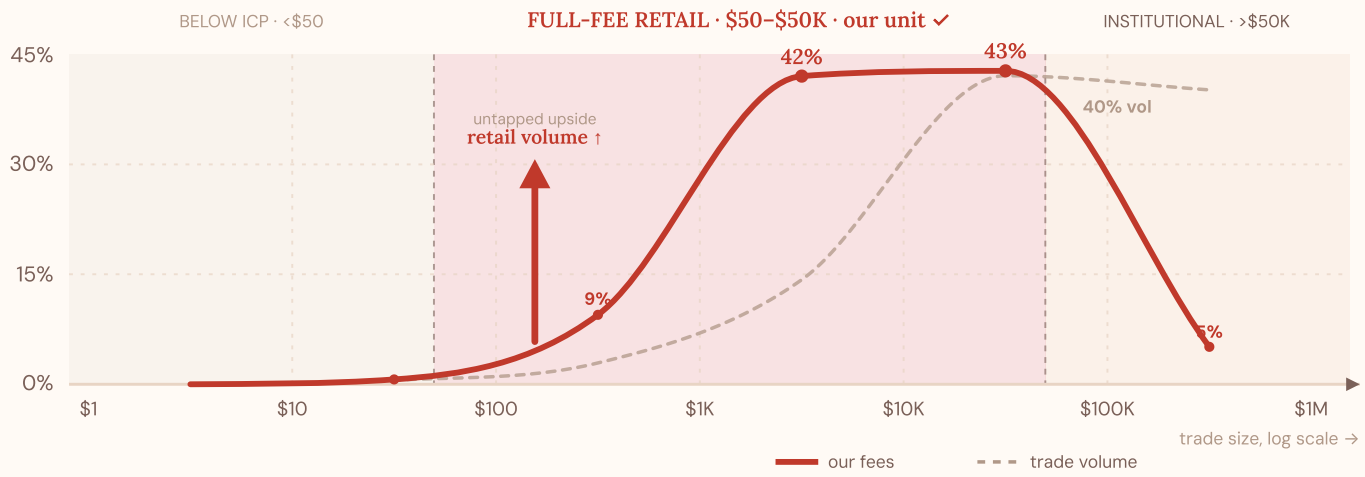

INSIGHT

The limit is attention, not deposit amount

Volume concentrates where deposits are larger — **big accounts already run automation and split their trades into parts**. Retail doesn't: no convenient, affordable tool exists for them.

OUR FEES VS TRADE VOLUME ACROSS TRADE SIZE · 8-EXCHANGE BLEND, SPOT:PERP 12:88

Open Trader fills that gap.

Trade-size distribution — volume & fees based on our research.

ROADMAP & GO-TO-MARKET

0–6 MO

Iter 1 · MVP

- Trader Data + Trader Engine
- Trader HUD
- Trader Strateg + Trader Sandbox
- AI-Asassin
- First exchange connections
- Company formation — Kazakhstan, AIFC — a special regime under English common law

7–12 MO

Iter 2 · Full product and marketing

- Fee share
- First revenue
- Mobile client
- GTM — Telegram/X, YouTube EN, PR (Decrypt, Forklog), IBW Istanbul, NBX Warsaw
- Preparing the business to operate globally. Planned jurisdictions: Cayman Islands/Singapore + Kazakhstan, AIFC (operating)
- **Seed round closed — mo 12**

13–36 MO · TO SERIES A

Iter 3 · Scaling

- Team hiring
- Scale-up marketing
- US market entry · LatAm, SEA
- Operational break-even mo 22 · cumulative payback mo 33
- Apps in all stores
- **Series A raise**

GO-TO-MARKET — ORGANIC-LED, NO PAID RETAIL ADS

- **Open Source** — GitHub, HN, Reddit → viral, organic reach
- **SEO / content** — compounding organic search
- **Exchange partnerships**
- **Conferences** — iFX Dubai, IBW Istanbul
- **Crypto media** — Decrypt, CoinDesk, Forklog
- **Retention** — M3 (90-day) 40–50%

TEAM

AI-centric operating model

One senior per vertical + AI assistants. Each hire delivers ~3–5× a classic role — low burn, full ownership, no coordination overhead.

ANNA & ALEKSEY TIKHVINSKY — CO-FOUNDERS AND A FAMILY

One household, one mission — full commitment, continuous collaboration on the idea.

Aleksey Tikhvinsky

CEO · CTO · AI Dev — covers 100% of MVP

· Technology visionary

· 25+ years in software engineering

· 15+ years in startups

· 5+ years in blockchains

· Areas of interest: blockchain, cryptography, game theory, exchange trading

Anna Tikhvinskaya

CPO · BizDev

· Investor docs, outreach, due-diligence

· Experience working with business partners and running a project end to end

· Background: professional musician & project founder

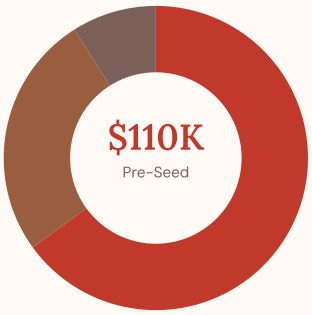

THE ASK

Pre-seed $110,000 — Seed target month 12

The MVP ships by month 6–7. Months 8–12 — a full working product, baseline marketing, investor outreach and closing the Seed round by month 12.

USE OF FUNDS

Development	65%
Marketing & PR, conferences	26%
Infrastructure, operations & legal	9%

INSTRUMENT	ASK	CAP	DISCOUNT	EQUITY
SAFE	$110 000	$1.1M	20%	~10%

PATH & BREAK-EVEN

Operational break-even — mo 22 · cumulative payback — mo 33. Peak cumulative loss $0.53M (mo 21) is covered by the Seed round. Seed closes by mo 12 (0 funding gap). Jurisdiction: Kazakhstan, AIFC → Cayman/Singapore before Seed.
